

Integration Services

Rave Computer provides integrated solutions from Design to Delivery.

Rave's integration services will reduce your deployment time and help you deliver your product to customers. Our services range from assembly only to providing a total turnkey solution. Rave offers scalability without capital investment and delay of expanding your own infrastructure. Our integration facility and project management expertise will accelerate your time-to-market, reduce the risk of improperly configured systems, minimize technical support costs, and deliver cost-competitive, top quality products to you or your customers. With our highly flexible production model, Rave will accommodate small or large volumes of variable designs at cost-effective prices, unlike contract manufacturers who can only turn out large runs of identical products. Rave will build the solution with advantages that positively impact your bottom line.

Integrated Solutions from Design to Delivery

KEY RAVE DIFFERENTIATORS INCLUDE

- No minimum run
- Build to forecast and ships per your schedule
- Storage of finished goods
- "Ship to shelf" - completely integrated products warehoused for immediate shipment
- Product invoicing after shipment from Rave
- Multi-vendor hardware o/s compatibility testing
- Application software testing after load
- No project management fees
- Product life cycle management
- Immediate access to technical support

The products we offer are available as fully integrated, tested and certified system solutions.

EXPERIENCE

With over 20 years of experience, we offer a wide range of services throughout the product lifecycle. Rave's technical team has the expert knowledge in delivering the products and solutions you need.

Rave offers a completely integrated system or racked solutions, and provides a flexible global supply chain for the lowest total cost. Rave also provides a broad range of services to customers in need of server, workstation, desktop, mobile computing, and storage solutions.

Rave offers more than just integration. We also provide:

- Product development and system design
- Electrical and mechanical engineering
- Build and configure to order
- Supply chain management
- Packaging and handling of shipments nationally and worldwide
- Product obsolescence/EOL management
- Project management
- Technical support and consulting
- Private labeled branding
- Quality reporting
- Custom software installation with customized recovery solutions
