

RR-1440

1U Rackmount Server

Powered by Dell

RAVE Computer's powerful and ultra-dense, 2S, 1U RR-1440 server offers the performance of Intel® Xeon® 5500 series processors, DDR3 memory, the availability of up to four hard drives (3.5" or 2.5") and an exceptional value.

The RR-1440 features include an available "open" High-Performance Computing Cluster (HPCC) software stack, excellent diagnostics with interactive LCD and an optimum chassis depth of 24" for space constrained data centers and HPCC environments.

The RR-1440 was developed with a purposeful design; energy optimized technology, advanced virtualization capabilities and simplified systems management.

PURPOSEFUL DESIGN

The RR-1440 takes advantage of RAVE's outstanding system commonality and reliability. Quick release rack latching and purposeful placement of interface ports and power supplies enable easy installation and redeployment. Robust, metal hard drive carriers and an all steel control arm can further increase structural integrity and help eliminate creep.

The purposeful design of the RR-1440 provides reduced complexity, showcasing clutter-free cable routing for more efficient airflow and easier maintenance. An LCD screen positioned by the front of the bezel provides aisle level access to deploy the server.

ENERGY-OPTIMIZED TECHNOLOGY

The RR-1440 features energy tuned technologies that reduce power consumption while increasing performance capacity so you can compute more while consuming less. The energy efficient power supply units are right-sized for system requirements, with improved system-level design efficiency, policy-driven power and thermal management and highly efficient standards-based Energy Smart components. A robust fan cage design with hot plug single pull fan modules provides quiet acoustics and eases maintenance.

Energy efficient, compact and quiet the RR-1440 is designed with value and reliability for HPCC computing environments.
