

Rave Ignition™

High-Performance Engineering Workstations

Superior Performance for Maximum Results

Rave understands the complexities of designing and building computer solutions which allow maximum performance for CAD/CAM/CAE applications such as CATIA, NX (Unigraphics), Pro/ENGINEER, SolidWorks, Solid Edge, AutoCAD, Autodesk Inventor and other software applications used for engineering Simulation and Analysis.

If your company is looking for world-class engineering workstations that utilize industry leading technology for processing, graphics and storage at competitive prices, partner with Rave for computer solutions designed to meet your specific needs.

Rave systems utilize only premium components from companies like Intel, AMD and NVIDIA. Rave is also a certified Business Partner with both Dell and HP allowing us to provide the optimal solution for your engineering workstation needs.

Engineering Workstations

Superior Performance. Flexible Configuration.

Rave Ignition systems are designed to provide outstanding performance for CAD/CAM/CAE applications and are available in several configurations based on your needs.

- The Rave Ignition Standard systems are excellent for 3D CAD
- The Rave Ignition Premium workstations offer increased capabilities for processing and graphics.
- The Rave Ignition Elite is the fastest, most powerful workstation solution utilizing dual socket, six core processors for maximum processing power.

All Rave Ignition systems offer robust capabilities at competitive prices. However, if you have specific requirements or preferred components, we are happy to work with you to configure systems to meet your specific needs.

Rave offers flexibility you won't receive from other major manufactures

Consultative Approach

At Rave, our philosophy is to provide optimal workstation solutions which maximize productivity for engineers and designers. We accomplish this by listening to the needs of our customers to understand how the systems will be used and then aligning solutions which provide the best value with consideration to factors such as price and performance.

Rave recommends workstations based on YOUR needs

Easy, Cost Effective Upgrades

Rave Ignition workstations can be easily upgraded as user needs change and technology evolves. We will work with you to only upgrade those components which will help increase speed and productivity. All Rave engineering workstations utilize the same chassis which makes the upgrade easy and cost effective.

Rave systems preserve your investment reducing your cost of ownership over the lifecycle of the system

Guaranteed Reliability and a 3-Year Warranty

At Rave, we are committed to providing engineering workstations built with world-class quality. All Rave Ignition workstations go through a rigorous quality inspection process and are fully tested with an overnight burn-in. The Rave Ignition Standard offers outstanding reliability and a 3 year warranty.

- Premium components backed by direct manufacturer relationships
- Lifetime toll free hardware technical support with our extensively trained technicians
- Quality Assurance Inspection Process
- Fully tested with overnight burn-in
- ISO:9001:2008 Certified

Rave, an industry leader for over 22 years, is proud to offer world-class workstations to users of CAD/CAM/CAE software.

Configure it your Way

The Rave Ignition product line come in three different configurations. They are pre-configured and designed to run CAD/CAM/CAE applications at optimum efficiency. However, if you have specific requirements, we are happy to build systems to your specifications. Rave offers alternative choices for processors and a wide variety of options for memory, storage and graphics.
