

## Industrial Grade Computing Solutions. Optimized for Maximum Strength.

Rave is a leading manufacturer of Industrial computing systems with over 22 years experience of building ruggedized, rackmount, embedded, digital display, mobile and panel computers. Rave currently supplies the market with industrial computer solutions ranging from vision based, robotics control to silicon ion implanters. From design to delivery, Rave engineers consult with customers through all phases of their projects including planning, deployment and post-deployment.

Integrated Solutions from Design to Delivery

# Industrial Grade Computing Solutions

Rave prides itself in having the ability and resources to provide cutting-edge technology in industrial grade computing platforms to satisfy all mission critical embedded and industrial applications. RAVE Computer offers a full range of products that extend from compact embedded computers to fully customized solutions. The majority of Rave's solutions can be ruggedized for harsh conditions where water, dust, vibrations and extreme temperatures are a factor.

Rave is a leading manufacturer of Industrial computing systems with over 22 years experience of building ruggedized, rackmount, embedded, digital display, mobile and panel computers. Rave currently supplies the market with industrial computer solutions ranging from vision based, robotics control to silicon ion implanters. From [design to delivery](#), Rave engineers consult with customers through all phases of their projects including planning, deployment and post-deployment.

Rave is an expert at optimizing industrial solutions for maximum performance by leveraging the latest technologies. All of Rave's industrial systems offer advanced flexibility and functionality with the long lifecycle your specifications require. As with all of Rave's products, each system is backed with the RaveSpec<sup>SM</sup> ADVANTAGE Guarantee, which means you have the assurance that each system is rigorously tested and burned overnight and is put through a RaveSpec<sup>TM</sup> 12-point Reliability check before leaving our facility.

## Lets Build It Together

Rave believes in giving you flexible options, because every customer's needs are unique. Rave's systems engineering team works with you to first identify your core business objectives then follows a proven model that provides a framework to keep a project on track. From design to delivery, Rave engineers consult with customers through all phases of their projects including planning, deployment and post-deployment. By partnering with Rave, you can be sure that your investment in "best-of-breed" components is maximized with a high degree of deployment flexibility, energy efficiency, scalability and manageability.

## Custom Design

If you're looking for a faster, more reliable, lighter, smaller, or more cost-effective system solutions, Rave can provide proven solutions tailored to meet your needs. We develop complete systems from concept through production with one goal in mind; providing our customer with the most reliable and comprehensively designed and tested systems for their specific requirements. Whether your environment is impacted by electrical, mechanical, thermal or acoustic challenges, Rave has the knowledge and experience to deliver a custom solution that will meet your demanding conditions. With Rave you have the assurance that your system has been optimally configured and rigorously tested.

## Modified COTS

Rave also develops and modifies commercial off-the-shelf solutions (COTS) to address challenges such as shock, vibration, noise, EMI or any other potential hazards. Rave will evaluate your project requirements and determine what is necessary to ensure the product is compliant with your specification. Let Rave bring innovation and experience to your next COTS project.
