

Rugged Mobile. Built Tough.

Rave offers rugged mobile laptops, tablets, handhelds, and portables that are designed to withstand even the harshest environmental factors.

Whether your application requires a semi-rugged or fully-rugged system, Rave will personally consult with you to evaluate both your technology and environmental requirements, to recommend fully deployable mobile solutions that fit your specific needs.

Visit rave.com to view our full line of rugged mobile computers.

Rugged Mobile Computing Solutions

Consultation and Configuration Flexibility

Mobile computing solutions vary in their capabilities and are manufactured to meet different environmental requirements. Without careful research it's easily possible to select a product with performance, ruggedness or incompatibility issues as they relate to your specific requirements.

Let Rave's experts help you choose the product that is best suited for you. One source to get an objective overview of the products available from several manufacturers. Rave will interface with our contacts, leverage our relationships and can often offer product and service flexibility beyond what is available through the manufacturer's standard product line.

Features and Benefits

Rave understands that ruggedness is only a part of the mobile solution and performance is a key factor in any successful deployment. That's why we offer a full range of rugged mobile laptops, tablets and handhelds that are configured to meet both your rugged and technology needs. Rave through its partners offer mobile computers in various models to fully meet the needs of the mobile workforce, such as:

- Rugged, mobile design, necessary for field use
- Durable, rugged or semi-rugged systems that are sealed for hostile environments ensuring continued performance regardless of hazards such as shock, vibration, liquid or dirt
- Expandable for applications where additional functionality, connectivity and capacity are required
- Powerful, with workstation equivalent performance
- Daylight-readable screens (up to 1,000 nit) for outdoor use
- Touchscreens for easier navigation of software
- Superior battery life for longer uptimes
- Built-in handle for easier portability, reducing the need for bulky carrying cases
- Replicator ports for docking on a desk or inside a vehicle
- Reinforced, integrated antenna retracts into case design to protect against damage
- Sealed LCD to provide extra protection against moisture and dust
- Internal dampers and seals isolate the LCD from shock, vibration and moisture
- HDD mounted in damping polymers to help insulate against sudden blows
- Flexible connectors between the hard drive and system board to protect against the transfer of shock from drops and bumps
- Sealed keyboard and touchpad prevent damage from dust and spills
- Environmental seals protect the multimedia pocket, PC card slots and connection terminals from moisture and dust
- Full or partial magnesium alloy casing that protects against bumps, drops and knocks
